DETAILED ACTION

Allowable Subject Matter

Claims 1, 2 and 4-13 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 8, 9, 11 and 13.

Specifically regarding claims 1, 8, 9, 11 and 13, Hall et al. (6201638) and Gunn et al. (7260279) teach the state of the art of an optical frequency comb generator, an optical resonator and an optical modulator.

But, Hall et al. or Gunn et al. fails to explicitly teach a combination of all the claimed features including an electrode formed on said light waveguide path for propagating said modulating signal, oscillated by said oscillation means, in the outward path direction or in the backward path direction, said optical modulating means phase-modulates the light propagated in said outward path direction by said modulating signal propagated in said outward path direction, while phase-modulating the light propagated in said backward path direction by said modulating signal propagated in said backward path direction, as claimed.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
